

Introducing the Workplace Change Maker Package

Embrace the global trend and let Victory Gardens help you join the growing list of innovative organisations like Google, Twitter and Skype who are designing relaxing yet functional spaces for a happier and healthier workforce.

Studies have shown that daily and immediate contact with green spaces around the workplace can reduce blood pressure and the prevalence of stress hormones which, in turn, reduces lifestyle diseases such as obesity, coronary artery disease, stroke, dementia and depression.

Green spaces in your workplace can bring real results such as:

- Improved focus and attention
- Enhanced self awareness
- Effective conflict resolution
- Reduced stress
- Positive team building
- Greater productivity

Victory Gardens offers design, installation and maintenance services around the use of gardens to support the mental and physical health of your workplace.

Our *Workplace Change Maker* package includes:

- Site assessment and design consultation
- Installation of modular, self watering gardens
- Styling and furniture fit-out
- Workplace engagement strategies
- Seasonal maintenance
