

## Introducing Victory Gardens' Sensory Garden Package

Victory Gardens is about building a sense of community, getting people's hands dirty, and reconnecting with the environment in a positive and fulfilling way.

Most gardens offer visual appeal, but at Victory Gardens, we also offer sensory and edible gardens combined with a range of gardening activities for healthy and active living.

Our *Sensory Garden Package* includes:

- Site assessment and design consultation
- Installation of modular, and/or mobile, self watering sensory and/or edible gardens
- Community engagement activities around gardening
- Seasonal maintenance

Studies have shown that being actively involved in gardening, even looking at green natural spaces improves health and wellness.

We offer residential developments, aged care and child care centres, the opportunity to engage residents in the pleasure of gardening by tailoring workshop activities to suit your clients' needs.

For convenience our gardens are:

- Raised to a perfect height so there is no need for bending and squatting
- Compact for small balconies and courtyards
- Modular for large or small common areas
- Mobile, with lockable wheels so they can be moved to chase the sun.
